PROGRAM OF THE INTERNATIONAL COMPETITION "FG CROATIA 2026" AS PART OF THE "12TH TOY FESTIVAL"

IT CLUB "NET" IVANIĆ-GRAD

Below we enclose the program plan for the organization of the international robotics competition under the auspices of the Informatics Club "NET" and the City of Ivanić-Grad in co-organization of the TETRAGON association, the Croatian Robotics Association and the Community of Technical Culture Ivanić-Grad as part of the "12th Toy Festival" **on May 23 and 24, 2026..**

The competition is a friendly form for the purpose of socializing and educating about STEM (science, technology, engineering, mathematics) culture.

This is a robotics competition for high school students and associations; Slovakia, Slovenia, Bosnia and Herzegovina, Kosovo, Macedonia, Montenegro, Albania and Serbia.

We invite these countries as guests to our Ivanić-Grad to promote the already mentioned STEM, for the purpose of rapprochement through technology and knowledge exchange, and most importantly, socializing and mutual understanding.

As for the domestic teams, this competition is a "pre-competition" for the teams that will fight for the selection **of representatives of the official national team of our country** at the world robotics Olympiad **FIRST Global challenge, Incheon, South Korea 2026 (07.10.-10.10.2026.)**

We are expecting about 10 teams from other countries and a few of our own teams.

The program will be rich on both days with the "12th Toy Festival" and our event, and every visitor or fan of technology, video games or 3D printing will find something interesting with us.

Venue of the competition:

- Sports Hall of Ivan Švear High School, Školska ulica 12, 10310 Ivanić-Grad

Venue of the "12. Toy Festival":

- Zelenjak Sports Park
